

ROCKIN' AROUND NEW MEXICO

JULY 6–8, 2022

HOODOOS
AND HAZARDS

GEOLOGY WORKSHOP

SAN JUAN BASIN

A 2.5 day geology workshop
(with optional graduate credit through
the Masters in Science–ST 540 course)

Rockin' is for certified, NM K–12 teachers interested increasing their knowledge of geoscience and geologic risks. This field-based workshop will focus on landforms and hazards associated with the San Juan Basin, near Farmington, NM. Participants will explore sedimentary processes, rare earth elements, carbon sequestration research, regional seismicity—and the importance of preparation for geology-related hazards.

*Workshop participants need to be able to walk at least one mile in arid conditions

Resource materials and
supplies included!

For information about taking ST 540 Rockin' Around New Mexico as part of the Master of Science for Teachers program at New Mexico Tech, call **Megha Khandelwal** at (575) 835-5470, megha.khandelwal@nmt.edu.

To register as professional development call **Cynthia Connolly** at (575) 835-5264, cynthia.connolly@nmt.edu.
